Attachments: P3-WIP-Meeting.pdf

John—thanks for touching base prior to our meeting on Wednesday re: outlining roles and prioritizing the planning, prioritization and reporting needs of our county partners as we move forward. I believe we are on the same page with you in that we are definitely seeking a streamlined approach in these areas that county partners can use. I also need some clarification as to what everyone has been working on (thus the 10 minute presentation request in the meeting notice) and further discussion on how it all fits together. I also need to understand how the Ches. Conservancy has been working with you and what their goal is when working with counties.

I think Wednesday's meeting is timely and I'd very much like to find the simplest and most practical way to leverage existing systems like FieldDoc to meet the needs of county/local partners. Please see the attachments I just sent everyone in the updated meeting notice—perhaps we need to look back a bit as we look forward. We met with county partners in the spring and again last week and the message is clear. We just need to be sure we are all working together on this end to keep this moving forward effectively and efficiently.

Thanks!
Kristen

Hi Kristen and Jordan,

Hope you had a great weekend and thanks again for your work and inclusion of our efforts at the WIP Meeting this past Friday. Overall I thought it went really well and I think we are on firm ground for next steps in our work together. If it's at all helpful I've attached notes that I managed to take and feel free use or discard as necessary.

With respect to tomorrow's meeting I will be joining remotely. I had planned to clearly outline our known roles to date as well as talking through what I think are some important items to think about prioritizing in FieldDoc given Friday's meeting. Feel free to push back but to me my big take away from the counties was that reporting is something that really needs to be streamlined across programs and funding sources. This is something that we plan to tackle in FieldDoc but given counties voicing it as a need, I'd recommend we try and front load it. I'll be checking in with my team but I'm fairly confident that from FieldDoc we could set things up so that any program maintained in the system could have its reporting requirements rolled into a given project. This would afford the user the ability to report through one system vs a new system for each program. Let's keep the discussion going and looking forward to next steps.

Best,

-John
